Art Unit: 1626

Receipt is acknowledged of the reply filed January 16, 2003, which has been entered in the file.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 18 to 31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 18 of U.S. Patent No. 6,187,799. Although the conflicting claims are not identical, they are not patentably distinct from each other because a substantial amount of the compounds in the claims are identical. For example, the twenty nine compounds used in the method of instant claim 18 are the same as twenty nine of the thirty compounds used in the method of claim 1 of the patent. One of ordinary skill in the art would have been motivated to make the claimed compounds with

Art Unit: 1626

the expectation that they would be useful for the same purpose as disclosed in the patent.

Applicant's arguments filed January 16, 2003 have been fully considered but they are not persuasive. Applicants state that there is no motivation for one of ordinary skill in the art to make the full scope of the present claims, in view of the claims of the cited patent. The motivation for one of ordinary skill in the art to make the claimed compounds is the expectation that they would be useful for the same purpose as the compounds of the patent which is the treatment of tumors mediated by raf kinase.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1626

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
